

Load or Find Your Music

If you own the music:

Use Apple's notes for putting your music into the device library

(Cadance uses the actual Apple Music library on your devices).

Import songs from CDs on PC or Mac

Use Finder to sync your device

Push your music to your Apple Music subscription

If BarreNotes or Apple Music app work:

That same music is in Cadance, but be sure that you grant access. Go to device Settings > Apps > Cadance and enable **Media & Apple Music**.

In Cadance, look for your music under the center tab **Albums / Artists device music library**.

Your playlists and folders will appear under the Playlists tab, which is a sorted list of those found in your Apple Music library.

Skip the device library and play your music directly from Files:

See the Local Storage topic.

Load music from syllabus programs and dance societies:

See the Syllabus tab topic.

Explore the huge Apple Music library:

Our curated playlists are a great place to start, with many hundreds of albums represented. Click the track action button ..., select **Open in source album**, and check out the **Artist's Catalog**, now fully streamable with full tempo control.
