

Spotify Challenge

All streaming services have Pros and Cons for dance. Spotify is known for having a large music library and some music discovery tools.

You can earn 10 free Cadance Day Passes by identifying an album, that you need for dance, that exists on Spotify and can't be found on Apple Music. Let us know what you find! Only the first report for an album will be considered.

If you want to support artists, buy the albums. [Bandcamp](#) is a great place for that. You can then load the owned tracks into Cadance.

Purchase your music (without needing a music subscription) from the iTunes Store to have it automatically installed to your device library and Cadance.

Sadly, we can't do anything with rented or streamed music from other platforms. This is due to the platforms protecting what they rent out, and beyond our control.
