

Clock & Battery Display

The clock display has two modes:

Actual Time

In 12 or 24 hour display. Digits are always white.

Class Timer

Counts down from typical class length: 90, 75, 60, 45, 30 or 15 minutes. Digits turn from teal to red when the timer reaches zero.

At the bottom of the display is a bar graph representing the **battery level** on your device, moving from green to yellow and then red as the

battery level drops.

We are constantly testing Cadance to keep it gentle on your battery.
