

Playlists **My Cadance** playlists

The three main tabs in Cadance have two sides each. This is represented in this tour as

 Side A  Side B. The first tap activates the tab, the next flips it between A & B.

Playlists **My Cadance** playlists

This pane, with **black background**, features your Apple Music library playlists as seen in Apple's Music app, sorted alphabetically.

Your Apple Music playlists are not editable in Cadance since this is not supported by Apple. This is the only Playlist support offered by the retired BarreNotes app.

One special folder that exists only in our app is **Cadance Resources**.

These public playlists are maintained online and may automatically update. To preserve any of these, just import the Playlist to My Cadance and you can edit or improve your custom copy at will.

Remember: the **black background** indicates 'read only' playlist that are changeable only via the Apple Music App.
