No Repeat

No Autostart

Repeat 1x - 4x

Play All

Shuffle Play

Continuous Play Options

(Play All, Shuffle Play)

These will play all the tracks in the Album or Playlist, and this setting will be cleared when you move to a different music container.

No Repeat

Default setting, will play immediately (or as soon as possible with Cloud tracks) when a song is tapped. This was popular in BarreNotes.

No Autostart

New to Cadance - lets you set tempo before the track will play. If you need it, you now have it. Once set, this is very sticky.

Repeat 1x - 4x

The first play is considered 0 so selecting 2x will result in 3 plays.
