

Spotify Challenge

All streaming services have Pros and Cons for dance. Spotify is known for having a large music library and some music discovery tools.

You can earn 10 free Cadance Day Passes by identifying an album, that you need for dance, that exists on Spotify and can't be found on Apple Music. This is really rare, but let us know what you find! Only the first report for an album will be considered.

Purchase your music (without needing a music subscription) from the iTunes Store to have it automatically installed to your device library and Cadance.

If you want to support artists, buy the albums. [Bandcamp](#) is another great place for that. You can then load the owned tracks into Cadance.

Sadly, we can't do anything with rented or streamed music from other platforms, including Spotify. This is due to the platforms trying to protect the music that they rent out, is beyond our control, and they don't provide the needed access.
