

Playlists **My Cadance** playlists

These are your personal Playlists, created inside Cadance with features designed for teaching.

Per-track tempo memory: Every track remembers the last tempo you used on that track.

Organize with folders: Create folders up to four levels deep to match your teaching needs: by day, level, syllabus section, or however you think about your classes.

Build playlists your way: Create from scratch, or import from Apple Music or Cadance Resources. Add individual tracks from any container using the track action menu.

Tip: Tap the **⋮** button on any Playlist to edit tracks inline, regenerate the artwork collage, or fetch updated library artwork.
